

REPUBLICANS ARE READY FOR CONGRESS

Legislation for the Next Special Session Is Finally Agreed Upon

ACTION OF COURT ON NORTH DIVIDE

According to a telegram received this morning by J. Grant Cramley from George B. Thatcher, his attorney, an injunction was issued yesterday by the district court of Washington county against the officers of the North Divide Mining company. The court granted an injunction pending life and broadened the preliminary restraining order. By this action the officers are enjoined from selling any treasury stock or delivering any stock to J. E. Kerr, the one agent under the contract with him. The company is also enjoined from doing any business except acting upon the ground and from accepting any debts. The company cannot even go into debt for mining beyond the money now actually in the treasury. The court refused a temporary receiver on the ground that the company was fully protected by the injunction and innocent stockholders might suffer.

SOCIALIST SAYS TERMS MODERATE

(By Associated Press.) PARIS (Havas Agency), May 15.—Edmond Bernstein, German Socialist leader, in an article in Vorwarts, Berlin, transmitted here, said that the peace terms show evidence of compromise on several points and that a sense of moderation is evident. He pointed out that many demands on Germany were only of a temporary character and declared amelioration of some terms ought to be obtained through oral discussion. He reached the conclusion that Germany must say "no" to the actual conditions but this "no" must leave the road open for the allies.

WILL USE CABLES INFORM WILSON

(By Associated Press.) WASHINGTON, May 15.—President Wilson will be officially notified by cable of the assembling of congress when it convenes Monday in extra session. Congressional leaders decided in view of the president being in Paris, to use the cable as the official method in getting through the customary procedure of notifying him.

BRITISH AIRMEN MARKING TIME

(By Associated Press.) ST. JOHNS, Nfld., May 16.—Hawker and Raynham, the British airmen, have withheld a definite decision to take the air pending weather reports from mid-Atlantic. Local conditions are favorable for starting the projected trans-Atlantic flight.

DRAFTED AN ANSWER TO THE GERMAN NOTE

(By Associated Press.) PARIS, May 16.—It is reported that a special commission on territorial affairs, headed by Andre Tardieu, has drafted a pre-emptory answer to the German note registering objections to the treaty arrangements for the left bank of the Rhine and the Saar valley.

(By Associated Press.) VERSAILLES, May 16.—There is a distinct impression among some subordinate members of the German peace commission that the Germans will sign the peace treaty. One of the secretaries is quoted as saying: "What else can we do but sign. We are on the ground; your knees are on our stomachs, and your thumbs in our eyes."

TODAY AND A YEAR AGO

Official readings of the thermometer by the United States observer at Tonopah:

1919	1918
5 a. m.	47
9 a. m.	58
12 noon	66
Maximum July 15	71
Minimum July 15	46
Relative humidity at 2 p. m.	
yesterday, 14 per cent.	

TRANSOCEANIC FLYER STILL AT TRESPASSY

TRESPASSY, May 16.—Naval seaplanes, No. NC-4 and NC-5 and probably NC-6, will make another attempt today to take the air on the second leg of the trans-Atlantic flight via the Azores. Mechanics overhauled the NC-4 after her arrival last night from Halifax, hoping to have her ready to accompany the other seaplanes. The weather conditions along the route to the Azores are the best yet reported. Rough weather, out side Trespassy harbor, caused the two

seaplanes that started yesterday to abandon their plan. Commander Foxworth said the postmen were also due to the hope that the NC-4 would be able to join them. It is announced that a start will be attempted inside the harbor. Rough seas at the mouth of the bay yesterday dashed over the heavily laden plane, elicited the aviators to be home and threatened to play havoc with the steering apparatus.

Simon Silver Lead Exciting Attention

C. C. Book, vice-president of the Simon Silver Lead Mines company, of Mina, Nev., is in receipt of favorable advice from the management at Mina to the effect that great excitement prevails in the community over developments in the mine as work progresses in the adit on the 145-foot level. The adit which is being run from the footwall is now out in the neighborhood of 25 feet, every inch of which is in good solid ore of a very much better grade than the ore above. The adit is now being run on the upper levels have more than doubled and there is a very material increase in the silver content, while the lead values have also increased. This ore body is nearly perpendicular and on the level above is 77 feet in width and had been drilled in for 254 feet with the faces of both the east and west drifts still in solid ore and without encountering a break. When it is remembered that the largest part of the surface properties lies some distance east of the most easterly point yet attained by the east drift, and that geologists

have traced the contact and ledge on the surface for approximately one mile on the company's estate, the possibilities for this property's future appear well nigh limitless. Work is being pushed as fast as possible and it is the intention of the management after advancing the adit to the hanging wall, to drift vertically along the footwall to a convenient point to upgrade the large, continuous permanent shaft capable of handling the great tonnage which will eventually be required of it. The stock of the Simon Silver Lead Mines company was called for the first time in the San Francisco stock exchange yesterday, with sales at \$2.50. Applications for listing on the New York curb is being prepared. Mine men returning from the district report favorably excitedly de veloping into a full-fledged boom. Mina is filled to overflowing; a contract has just been let for the erection of a fine commodious hotel and an application for a charter for the "Mina" County Bank to be under the management of the Winfield Simon interests has been filed.

America May Mediate In a Adriatic Dispute

(By Associated Press.) PARIS, May 16.—Negotiations for adjustment of the Adriatic controversy, contemplated a direct settlement between Italy and Yugoslavia through American mediation. By this plan the Adriatic treaty will not specify the disposition to be made of Fiume, Istria and Dalmatia beyond detachment from Austria.

The council of foreign ministers today continued their deliberations on Austrian frontiers, dealing with the question of Fiume and it is considered unlikely that the treaty will be presented to the Austrians before Wednesday, and probably not until after.

Winnipeg Tied Up By General Strike

(By Associated Press.) WINNIPEG, May 16.—Telephone operators have joined the general strike stopping all telephone communication. The strikers and web pressmen have decided to join the strike. Undoubtedly this will compel three daily newspapers to suspend. Bakers have continued operation, although the bakers are striking.

No street cars are running. The only excitement is occasioned by the frequent appearance of the fire department manned by volunteers answering false alarms. The committee said the strikers are determined to remain out to help the metal workers obtain demands for higher pay and an eight hour day and better union recognition.

PLANS ARE OPEN FOR INSPECTION

George E. Holesworth, the architect, who is completing the Wingfield-Brougher offices adjoining the Bonanza establishment, has on display at the Mizpah hotel plans for a three-story apartment building which has been suggested as a means of relieving the congestion in Tonopah. The construction provides for studded walls plastered on steel lath with the inner finish in hard wall plaster. The

building includes every convenience for families distributed over forty apartments. Each suite of rooms has its own bath, toilet and kitchenette with general hot water service and provision is made for 24 single rooms. Two available sites have been secured tentatively. The ground required is an area of 160 feet square.

OAKLAND POLICE CHIEF TURNS IN RESIGNATION

(By Associated Press.) OAKLAND, May 16.—Chief of Police Nedderman, under indictment in connection with the charges of bribery in his department, resigned on the demand of City Commissioner Morse.

DIRIGIBLE OUT OF THE FLYING

(By Associated Press.) ST. JOHNS, Nfld., May 16.—The naval dirigible is reported to have been only slightly damaged when it broke from its moorings and drifted to sea yesterday. The craft is reported in tow of the destroyer Edwards, returning here. The dirigible crew believe there is no possibility of repairs being made here to fit the "Sail" for the projected trans-Atlantic flight.

The finding of the runaway has been only 85 miles off shore, led aviation officers to believe the craft either ascended to a great height and burst when the air pressure against the side was decreased or that the hull on the rim and which Capt. Charles Little risked his life to operate was sufficient to start the deflation.

The destroyer Edwards returned without the dirigible. She reported having been unable to find her.

SILVERFIELDS IN LATERAL WORK

Ben West, formerly with the Corn Belt mine at Belleville, has taken charge of the Silverfields Adit, Belleville, controlled by William Horner, Fred Burdham and associates and is rapidly bringing out the enormous reserves which were forecast in that property some after the adit was passed in sinking (presently now are being conducted from a depth of 125 feet where the company is drifting and cross cutting in emergency shafts. A shaft with compressor has been installed and is now running satisfactorily so that greater speed will be shown in development from this time on. The values below the 70-foot point continue showing from \$15 to \$250. This company has been attending strictly to legitimate mining since notice was first drawn to the ground by the phenomenal values uncovered near the surface and the strength of the ledge on which the discovery was made.

HONOR BUTTONS FOR SERVICE MEN

The war department has now approved a "Victory Button" to be issued to all men who served during the past war.

This button is of silver for those ordered in action and bronze for all others. It consists of a five-pointed star surrounded by a wreath, with the letters "U. S." in the center. These buttons are to be distributed by army recruiting offices. In order to obtain one it will be necessary for an applicant to present or mail his original discharge certificate to the army recruiting office, San Francisco recruiting district, 660 Market street, San Francisco, Calif.

Colonel John H. Gardner, who is in command of the San Francisco recruiting district announces that he will receive a shipment of 50 silver buttons on or about May 21. The bronze buttons will arrive a month later.

CAPT. J. W. GLOVER VISITS RELATIVES IN TONOPAH

Capt. J. W. Glover, late engineer in the United States navy and second in command at the port of New York, arrived this morning for a short visit with his brother-in-law, S. R. Moore. The captain says having missed the excitement of being sent abroad he has come to Tonopah as the next best place to find it, and is here to see what a real home-camp is like.

WOMEN'S HOSPITAL FUND OPERATING IN SERBIA

A head line in the Bonanza yesterday led to the impression that the Women's Hospital association was collecting funds to be used in Serbia when it should have stated Serbia as the text of the matter showed. Mrs. George Proovich is the lady who is taking such an active interest in the movement and not Mrs. Perovich, as mentioned.

RETURN OF RAILROADS AND OF ALL WIRE LINES

(By Associated Press.) WASHINGTON, May 16.—The Republican steering committee has agreed upon legislation to be given consideration by the house immediately after disposal of the appropriation bills. Subject to approval of the conference of Republicans representatives to be held tomorrow. This includes immediate repeal of the sem-luxuries tax, legislation to return telephone and telegraph companies to private control, railroad legislation determination of shipping policy.

BUSY SECTION OF THE DIVIDE

One of the busiest districts in the Divide section is around the Toggery mine where five companies are all engaged in earnest development with the object of getting down to the mineralized zone as quickly as possible. The most conspicuous feature on the landscape is the large \$20,000,000 galloway frame of the old Mohawk from Goldfield, which is going up on Jim's Divide, one of the companies owned by N. K. Cooper and associates in San Francisco, including some of the best men in the Western mining community. This headframe will be completed in another day. The hoist is on the ground and will be in running order very soon so that the shaft which is down 15 feet will be sunk with machine drills. The Toggery is being mined and a good natured race is on with this Divide to see which shaft will be first to reach the 100-foot point in the shaft. The drifts have the headframe up and the management is industriously sawing wood and pounding steel. The Silver is another active competitor for the honor of quick construction with the Reno Divide is getting busy with its headframe. After the adit is completed these five companies will make history at a rate that never occurred before in any mining camp.

SUPREME COURT REVERSES ITSELF

CARSON CITY, May 16.—Reversing a former decision the state supreme court has sustained a demurrer to a petition for a writ of prohibition preventing District Judge Moran from proceeding further with the case of Ralph Page of al against Mark Wagner and Frank Margerace, ordered the alternative writ discharged and the proceedings, which were originally instituted by the defendants, dismissed.

The matter was taken to the supreme court when Judge Moran refused to sustain a demurrer to a complaint filed by the Pages. The contention of the defendants was that causes of action had been improperly united. On the original hearing the court granted the alternative writ of prohibition prayed for. The matter then was presented on rehearing, the personnel of the court having changed, and was proceeded with as though it never had been previously submitted. The case involves stock in the Nevada Packard Mining company.

RANGE AND CROPS GOOD IN ELKO

Range and crop conditions in Elko county are reported as very satisfactory generally to the sheep and cattle men and ranchers who say that conditions are beyond their expectations for the season. To the east and north, in Pleasant valley, the North Fork and South Fork and Ruby valley sections, there is reported to be plenty of feed for stock and sheep on the ranges and the hay and other crops are in excellent shape and making good progress. Water has been plentiful in all the streams and ditches during the spring months owing to the early rains of the past few months and the heavy

passage of the softening amendment, tariff legislation, and measures, some of them national in scope.

ALLIES SEIZE TURKISH PORT

(By Associated Press.) PARIS, May 16.—Foreigners added naval concentration has begun at Smyrna in connection with the Greek date in Greece to maintain that city.

(By Associated Press.) ATHENS, May 16.—Greek forces have entered Smyrna. The Greeks were received here without opposition.

(By Associated Press.) ENGLAND.—A French dispatch received last Thursday stated that an important point in Asia which would soon be the scene for an increased military and naval movement. In which French soldiers, British and Italian warships would participate. The three also spoke of Turkish forces under the United States, British, American, and four United States aircraft and landed at Smyrna.

SERBS AND CROATS IN BLOODY FIGHT

(By Associated Press.) LONDON (Havas Agency), May 15.—Serbs fighting between Serbians and Croats in a Serbian province capital is reported in a Vienna dispatch in the Balkan Telegraph. It is reported that many combatants were killed.

GENERAL EXODUS FOREIGN LABOR

(By Associated Press.) WASHINGTON, May 16.—A widespread exodus of labor from the United States is reported in the Washington Post. The exodus is reported to be a result of the war and the demand for labor in Europe. It is reported that many combatants were killed.

NOTARY PUBLIC John C. Martin, Bonanza office, 1000 Broadway, Phone 864, or 592 Broadway avenue.

snowfall in the mountains during the winter months. This has resulted in a greater abundance of feed on the ranges than has been the case for a number of years past.

BUTLER THEATRE

TODAY

WM. S. (BILL) HART
in
